**Part II** Activities and Operational Information

- 1 Provide a detailed narrative description of all the activities of the organization — past, present, and planned. Do not merely refer to or repeat the language in the organizational document. List each activity separately in the order of importance based on the relative time and other resources devoted to the activity. Indicate the percentage of time for each activity. Each description should include, as a minimum, the following: (a) a detailed description of the activity including its purpose and how each activity furthers your exempt purpose; (b) when the activity was or will be initiated; and (c) where and by whom the activity will be conducted.

The Apache HTTP Server Project is an effort to develop and maintain an open-source HTTP server software product for various modern desktop and server operating systems. The goal of this project is to provide a secure, efficient and extensible server that provides HTTP services in sync with the current HTTP standards.

The goals of the Apache XML Project are; to provide commercial-quality standards-based XML solutions that are developed in an open and cooperative fashion, to provide feedback to standards bodies (such as IETF and W3C) from an implementation perspective, and to be a focus for XML-related activities within Apache projects. This project has been seeded with significant code contributions from a number of individuals and companies.

The Foundation was formed to provide a source for open, collaborative software development projects by supplying hardware, communication and business infrastructure; to create an independent legal entity to which individuals can donate resources and be assured that those resources will be used for the public benefit; and to provide a means for individual volunteers to be sheltered from legal suits directed at the Foundations projects. The Foundation seeks to be classified under the scientific purposes of Section 501(c)(3) as the organization is using its research for the public benefit through the open-source software it develops and sponsors.

The activities of the Foundation were officially initiated in May of 1999. Contributions have been received from the general public to support the efforts described above. In the Spring of 2000, the Foundation sponsored a conference to further the efforts of the Foundation in developing the open-source software. All activities to date have been performed by volunteer members and officers of the organization. In the future, the Foundation hopes to hire employees to handle the administration of the Foundation activities.

- 2 What are or will be the organization's sources of financial support? List in order of size.

The sources of the organization's support are individuals and businesses interested in the continued development of the open-source Apache software through the contribution of cash and other support. In addition, the Foundation also sponsors conferences to further the progress of the organization's activities.

- 3 Describe the organization's fundraising program, both actual and planned, and explain to what extent it has been put into effect. Include details of fundraising activities such as selective mailings, formation of fundraising committees, use of volunteers or professional fundraisers, etc. Attach representative copies of solicitations for financial support.

The Foundation's fundraising is conducted formally through the use of the internet web site of the Foundation. Contributors are able to make contributions through this site. In addition, the site provides information on the activities of the organization and how to contact the organization. Users of the open-source software also learn of the organization through the promotion of the Foundation through its conferences and work of its members. No solicitation materials are used at this time.

Exceptions — You are not required to file an exemption application within 15 months if the organization:
