

1 Development SVN mailing list

1.1 Description

The **modperl-cvs** list is the list where you can watch mod_perl getting patched. No real discussions happen on this list, but if you want to know about the latest changes in the mod_perl core before the rest of the people, this is a list to be on. Everytime something gets committed to the modperl SVN repository a mail is sent here with the diff.

Please read the mailing list Guidelines before posting.
