# 1   mod_perl 2.0 at the biggest Japanese employment site

## 1.1 Batara Kesuma <bkesuma (at) ml.gaijinweb.com> exclaimed:

- Date: Wed, 11 Jun 2003 15:20:45 +0900

- Traffic: 4 million pageviews / month

- URL: http://www.find-job.net

```
Find Job! http://www.find-job.net is the biggest computer and
Internet related employment site in Japan, and it is running on
mod_perl completely. We have around 75,000 registered users and 10,000
registered companies. Our pageviews are around 4 million per month. Our
whole system was running under plain CGI written in Perl, until
recently we changed it to mod_perl ModPerl::PerlRun with
HTML::Template templating system. On some scripts we saw up to 400% of
speed improvement, and total CPU load average went down around
50%. The change from mod_cgi to mod_perl ModPerl::PerlRun itself was
painless at all.

Right now we are working on our scripts, to make it mod_perl
ModPerl::Registry compatible. We are going to run our site on mod_perl
ModPerl::Registry once it is finished, and hope to see some more speed
improvement.
